

# A SHARED VISION

## The 10 Point Plan to Finance Biodiversity

### PRINCIPLES FOR ACTION

#### COMPREHENSIVE PACKAGE DEAL

We commit to work together towards a comprehensive package of actions on biodiversity finance from all sources.

#### GREENING FINANCIAL SYSTEMS

We commit to align financial systems and our economies with pathways to become climate neutral, nature-positive, resilient and less-polluting.

#### FINANCING SUSTAINABLE AND NATURE-POSITIVE ACTIONS

We commit to work together and with others to finance actions to close the biodiversity finance gap.

#### FOSTERING SYNERGIES IN ENVIRONMENTAL FINANCE

We recognize that we face several interrelated environmental crises including climate change, biodiversity loss, desertification, and pollution.

#### JUST TRANSITION

We commit to ensuring a just, equitable, and progressive transition to an economy that delivers benefits to all people.

### ACTIONS

#### INTERNATIONAL FINANCIAL FLOWS

Increase international finance, commensurate with ambition

#### SYNERGIES WITH CLIMATE FINANCE

Dedicate a significant proportion of their climate finance for nature

#### HARMFUL SUBSIDIES

Review national subsidies to redirect or eliminate all subsidies and incentives harmful to biodiversity and scale up nature-positive incentives

#### DOMESTIC RESOURCE MOBILIZATION

Use financial and policy levers to mobilize more biodiversity finance domestically

#### PRIVATE SECTOR ALIGNMENT

Develop policies to align financial flows so businesses reduce negative and increase positive impacts

#### PHILANTHROPY

Encourage further contributions from the philanthropic sector

#### MULTILATERAL DEVELOPMENT BANKS (MDBs) AND INTERNATIONAL FINANCIAL INSTITUTIONS (IFIs)

Call on MDBs and IFIs to pledge additional funds for biodiversity and to align their portfolios with the Global Biodiversity Framework

#### ACCESS TO FUNDS

Ensure multilateral and bilateral funding agencies and mechanisms accelerate, simplify and streamline access to financial resources

#### INTERNATIONAL MONETARY FUND

Encourage the IMF to provide support on conservation and sustainable use of biodiversity and on climate adaptation and mitigation

#### PARTNERSHIPS

Work together with all sectors and all levels of society to facilitate implementation of the Global Biodiversity Framework
