

Primary	Albany
Project Name Listed on Registry	Albany Water Board - Improved Forest Management Project
Registry ID number	ACR424
Project Listing URL	https://acr2.apx.com/mymodule/reg/prjView.asp?id1=424
Carbon Accounting Standard	ACR
Carbon Certification Standard	American Carbon Registry (ACR) Standard Version 1.2 (2018)
Registry Public Reports	https://acr2.apx.com/mymodule/mypage.asp
Carbon methodology	ACR Methodology Improved Forest Management Methodology Version 1.3 (2018)
State/Province/Other	New York
Country	United States
Crediting period (# of years)	20
Project start year	10/01/2017
Carbon Credit Vintages and Issuances	Carbon credit issuances by vintage can be found on the Public Reports section of the registry at the URL provided above.
NCS Pathways Combined	Improved Natural Forest Management
Emissions Reductions Type	Reductions and Removals. The number of reduction and removal credits issued by the project can be found in the Public Reports section of the registry at the URL provided above.
Durability Period	In accordance with the Carbon Certification Standard, the Project is required to maintain the project activities for 40 years.
Annual Carbon Credit Generation Volume	Ex-ante credit projections can be found on the Project Listing at the URL provided above.
Additional Project Notes	The Project meets standards established by law.
Additional Project Notes2	The Project has been third-party validated and/or verified. All relevant validation and/or verification reports can be found on the Project Listing at the URL provided above.
Additional Project Notes3	To address reversals, the Project contributes carbon credits to a buffer pool established by the crediting standard. The number of carbon credits contributed for each issuance is determined in accordance with Carbon Certification Standard and the Project Methodology. The calculations for such contributions and the contributions for each issuance can be found in verification documents on the Project Listing at the URL provided above.
Additional Project Notes4	The process to address any shortfalls of contracted carbon credits from the Project is specific to each agreement governing such carbon credits.
Additional Project Notes5	Documents containing data and calculation methods used to determine the number of emissions reduction and/or removal credits issued using the protocol can be found on the Project Listing at the URL provided above.
